EDUCATION

Artvin Coruh University
B.Sc. in Computer Engineering

Artvin, Turkey
Sep 2024 – Present

EXPERIENCE

Software Development Intern
Tostbang Teknoloji

Jul 2026 – Present
Diyarbakir, Turkey

- Contributing to web and mobile application development within a production-oriented team environment
- Collaborating with engineers on real project workflows, following established coding standards and review processes

Software Development Intern (Remote)
TNC Group / Software Persona

May 2026 – Jun 2026
Istanbul, Turkey

- Completed structured training in UI/UX & Web Design (Figma), JavaScript web development, SQL/databases, and mobile app development
- Built a portfolio project using Flutter during the mentorship track; received a certificate of completion

Receptionist
Crystal Waterworld

May 2023 – Aug 2023
Antalya, Turkey

- Communicated with international guests in English, resolving requests under time pressure

PROJECTS

Medication Tracking App – TEKNOFEST Health AI | *Flutter, Firebase, OpenAI GPT API* Jan 2026 – Sep 2026

- Developed a medication reminder and dose-tracking mobile app in a 4-person team for TEKNOFEST's Health AI category; competed at TEKNOFEST Sanliurfa
- Integrated the OpenAI GPT API to simplify complex medication instructions into plain-language guidance
- Implemented accessibility features including voice support for visually impaired users and color-blind-friendly UI
- Presented the project and its AI-assisted features to judges as part of the TEKNOFEST competition

Aura Fitness – Gym Management App | *Flutter, Firebase*

Mar 2026 – Jul 2026

- Built a cross-platform gym app with Firebase Authentication and Firestore for real-time data sync between members and trainers
- Developed a trainer-facing panel for creating and updating workout programs, with instant sync to member devices
- Designed member features for workout tracking, nutrition logging, and personalized training plans

Barber Appointment System | *PHP, MySQL*

Jun 2026 – Jul 2026

- Co-developed a web-based appointment booking system in a 2-person team with real-time status updates
- Built a business-side admin panel with calendar view for confirming, canceling, and managing appointments

Baril Medikal – Product Catalog Website | *PHP, MySQL*

Jun 2026 – Jul 2026

- Developed full-stack (frontend + backend) product catalog site for a medical equipment company in a 2-person team
- Built an admin panel for managing product listings and content updates
